

Proof of Concept

Our unique 'Proof of Concept' approach has helped businesses across the UK make informed purchasing decisions and manage the change process when investing in interactive technology. Customers are able to meaningfully experience the very latest cutting-edge technologies, innovative products and interactive solutions within their own corporate environments. By doing this they can build a real time business case for product implementation within the company by:

- engaging with potential users and obtain feedback about the technologies suitability for user cases
- evaluate and engage from a technical perspective (IT integration)
- obtain internal stakeholder 'buy in'
- make a small investment to justify the much larger long term implementation

Customers can utilise products on a rental basis for up to six months, with an option to purchase at the end of the 'Proof of Concept' period. All equipment is hand delivered to site by trained engineers, using mobile solutions for easy installation and setup. All equipment will be commissioned before the engineers leave site.

SMART Board

The Proof of Concept provides a SMART Board® on a TeamMate VariHite motorised height-adjustable stand, combining mobility and flexibility. This is a multitouch system that can make meetings more productive and training more effective. Collaboration becomes a natural and interactive experience.

This can be either SMART Board® 800 series interactive whiteboard and projector system or the SMART Board® 8000 series flat screen display. Both offer the most advanced interactive whiteboarding, aimed at businesses.

SMART Meeting Pro Software

SMART Meeting Pro software is an interactive whiteboard application that enables writing in digital ink over standard office software applications. It allows you to digitally capture and share ideas, analyse data, brainstorm, solve problems, document and distribute the results of team meetings. SMART Meeting Pro software provides a dynamic and engaging way to display material, present or keep meetings on track. Use SMART Meeting Pro to mark-up documents in Microsoft® Office® software applications like Word, Excel® and PowerPoint® in digital ink, or save whiteboard notes as PDF or PPT files to be distributed instantly via email.

Event Rental

Transform both internal and external business meetings, events, conferences and product launches - engage and encourage participants to enjoy a natural intuitive interactive experience on the latest interactive screens. Our rental team maintain a range of interactive surfaces to match to your event requirements.

Interactive technology fosters an environment where teamwork thrives. Whether it is brainstorming or presenting, your SMART Board will change the way your clients collaborate forever. Data changes within Microsoft applications plus any notes can be saved and mailed either during or at the end of the event to all attendees thus eliminating the need for time consuming data collation. Write with a pen, a finger or erase with a fist, use the touch screen to open documents, launch applications and navigate the Internet. SMART supports Microsoft® Windows® 7 touch gestures, so that objects can be manipulated with gestures like zoom, rotate, pan, flick and toss.

Interactive Voting solutions will engage audiences by providing instant feedback so they become totally involved in any meeting, presentation, conference or event. TurningPoint is a powerful audience response system which is easily implemented and is designed and built to bring multiple-choice audience interactivity. Built inside Microsoft PowerPoint® it works over any software on Windows® or Mac® and consists of polling software, credit card sized response keypads, response receiver and carry cases. ResponseWare is a revolutionary software application for enabling audience voting via mobile devices such as iPads, iPhones, laptops, mobile phones and pretty much anything that can connect to the internet. Turn your computer or mobile device into a virtual ResponseCard giving your audience the ability to participate regardless of location using their own device.

The opportunities are endless. We are good with ideas (and know how others have used the technology for their events). Give us a call and find out how you can make your next event excitingly different.
