

DTEN Vue Pro

Smart Camera System

New Solution Introduction

Patent Application Number 17/994,634

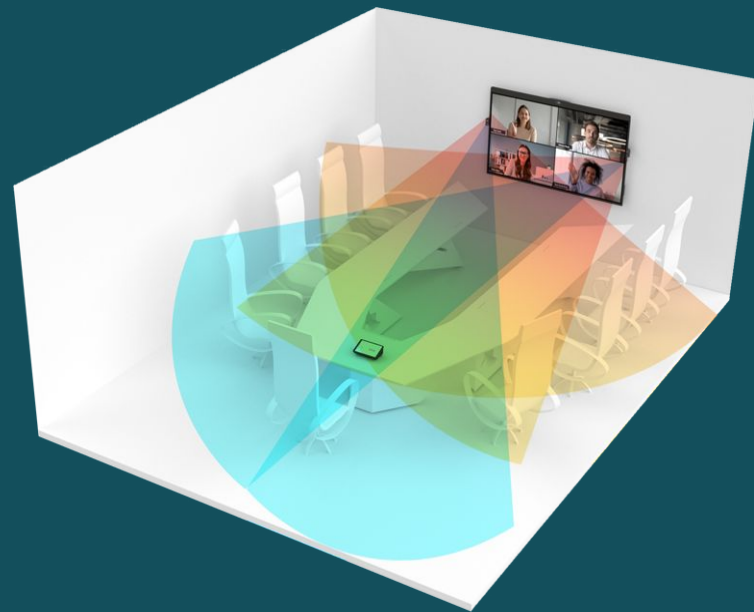

Innovative Design for **More Natural** Video Meetings

DTEN Vue Pro provides an innovative solution for capturing participants with 4K clarity, whether they are sitting at the front, middle, or back of the room.

Late for the meeting? DTEN Vue Pro will dynamically adjust to capture new participants on the fly.

- **Comprehensive multi-lens camera system covering spaces wide, near and far.**
- **AI Powered to automatically identify and optimize camera views for each participant.**
- **Capture every participant at an ideal camera angle and in crisp high-resolution.**

Unique in its class, **DTEN Vue Pro** is a set of professional 4K cameras cleverly designed to capture in-room participants *at eye level*.

**Natural Eye-to-Eye
Conversations**

**Maximum Clarity and
Coverage at Distance**

**Extensibility for Larger
Meeting Rooms**

Capture **Every** Nuanced Detail

Room View (Framed participant at 20' from camera)

Traditional Systems

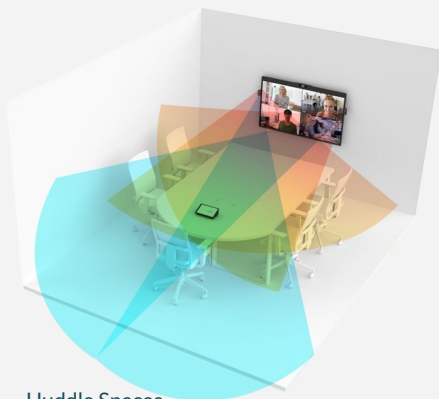

6X Better Clarity at 20' Distance
With DTEN Vue Pro

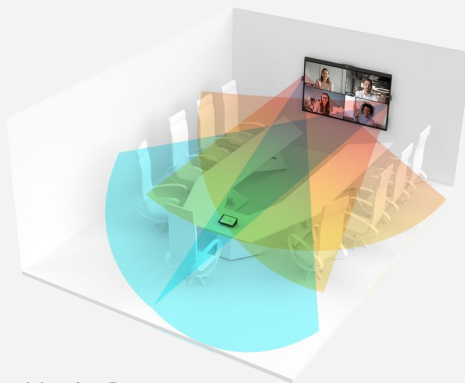

- AI-assisted technology identifies and dynamically optimizes for up to 6X better clarity at up to 30' distance
- Each participant is captured in crisp resolution, regardless of distance from the front of room system

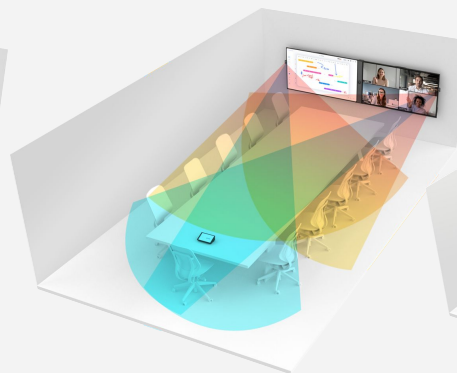

A Versatile System for a Range of Use Cases

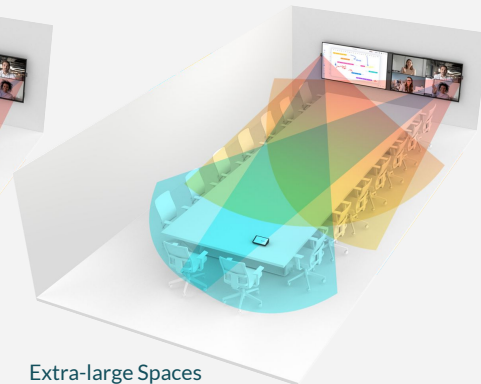

Huddle Spaces
Up to 6 Participants
D7X 75" Shown

Meeting Rooms
Up to 9 Participants
D7X 75" Shown

Boardrooms
Up to 11 Participants
D7X Dual 75" Shown (Vue Pro Included)

Extra-large Spaces
Up to 16 Participants
D7X Dual 75" Shown (Vue Pro Included)

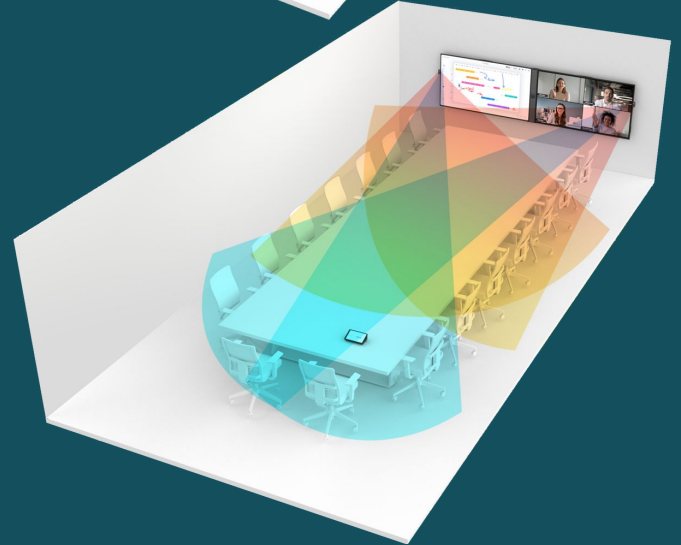

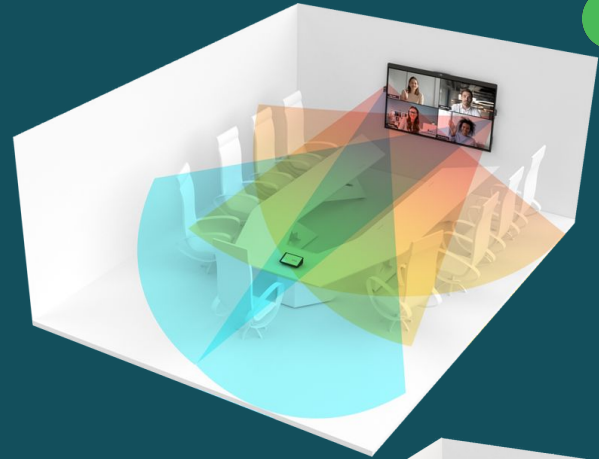

- Multi-lens camera design provides enhanced versatility in covering spaces wide, near and far
- Combined up to 160 degrees of camera coverage, free of “fish-eye” visual distortions of the picture plane

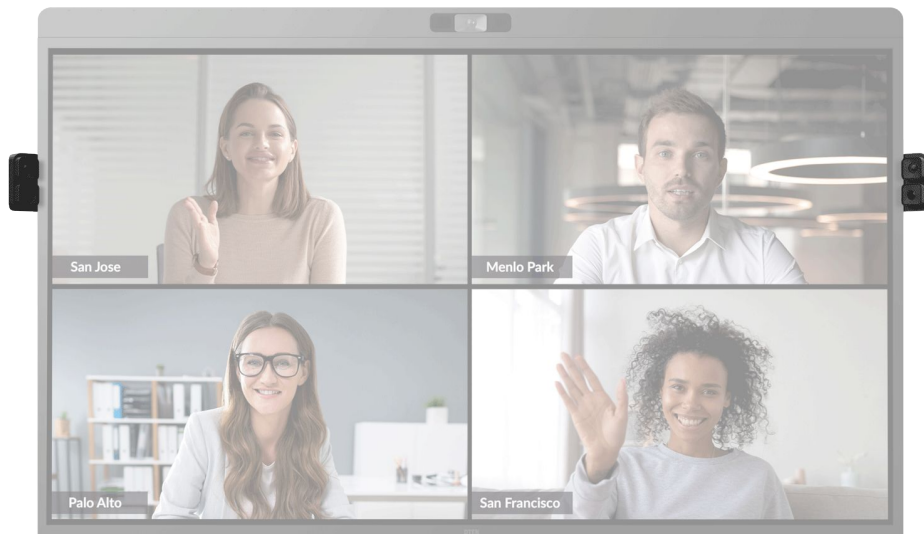

Why DTEN Vue Pro?

Only DTEN Vue:

- Combines 4K cameras with Smart AI to dynamically optimize for every meeting
- Employs multiple lenses to adjust for each individual participant, rather than capturing each participant at the same resolution and viewing angle
- Preserves image fidelity and clarity, whether participants are seated 7', 14' or 30' from the camera
- Provides crisp resolution, free of common “fish-eye” visual distortions
- Eliminates common PTZ camera related problems like drifting video, jerky camera movements or narrow field of focus
- Requires no manual control- AI takes care of everything

Designed for the **DTEN D7X** Windows Edition

DTEN Vue Pro sets up in minutes by sliding into a secure socket mount on either side of the **D7X 55"/75" Windows Edition**.

Once seated in place, the DTEN Vue will calibrate to the room and is ready for use.

* For earlier DTEN D7X models, the DTEN Vue and DTEN Vue Pro packages include an easy to install mounting bracket with alignment guide.

Thank You!
